

Name: Malaika Asim

Sap ID: 74507

Semester: 3rd

Department: BSCY

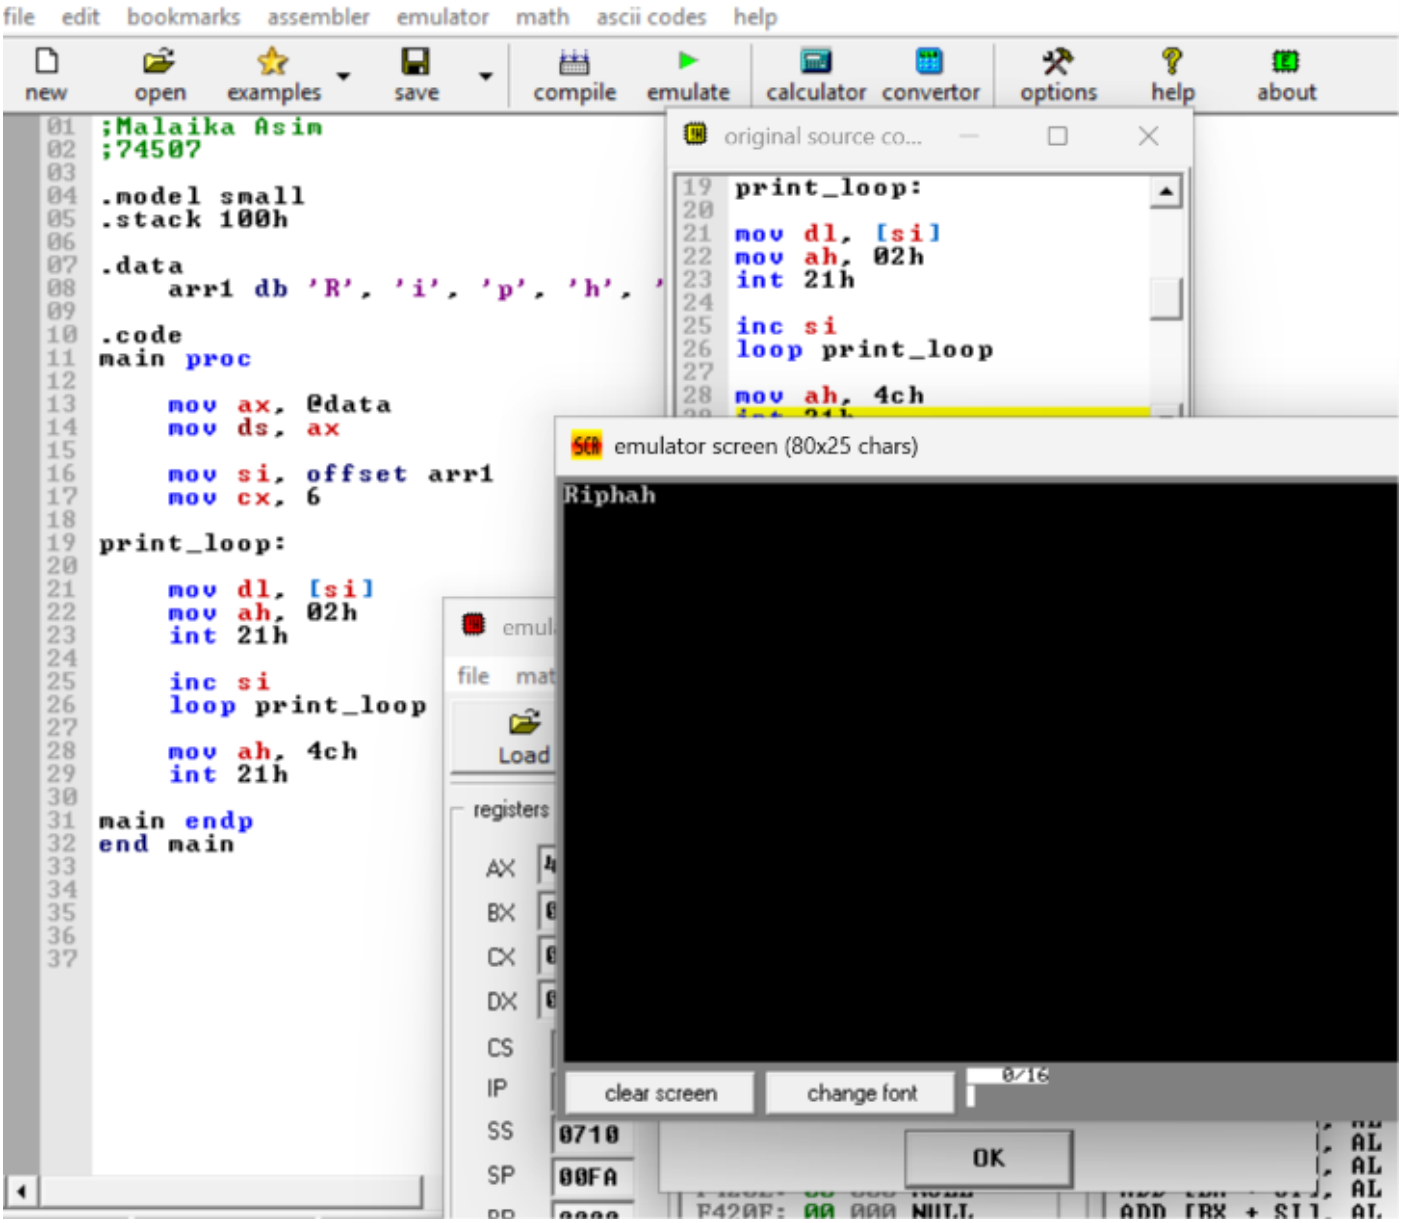

Course: COAL Lab

Instructor: Ma’am Rehana Sanam

LAB 10

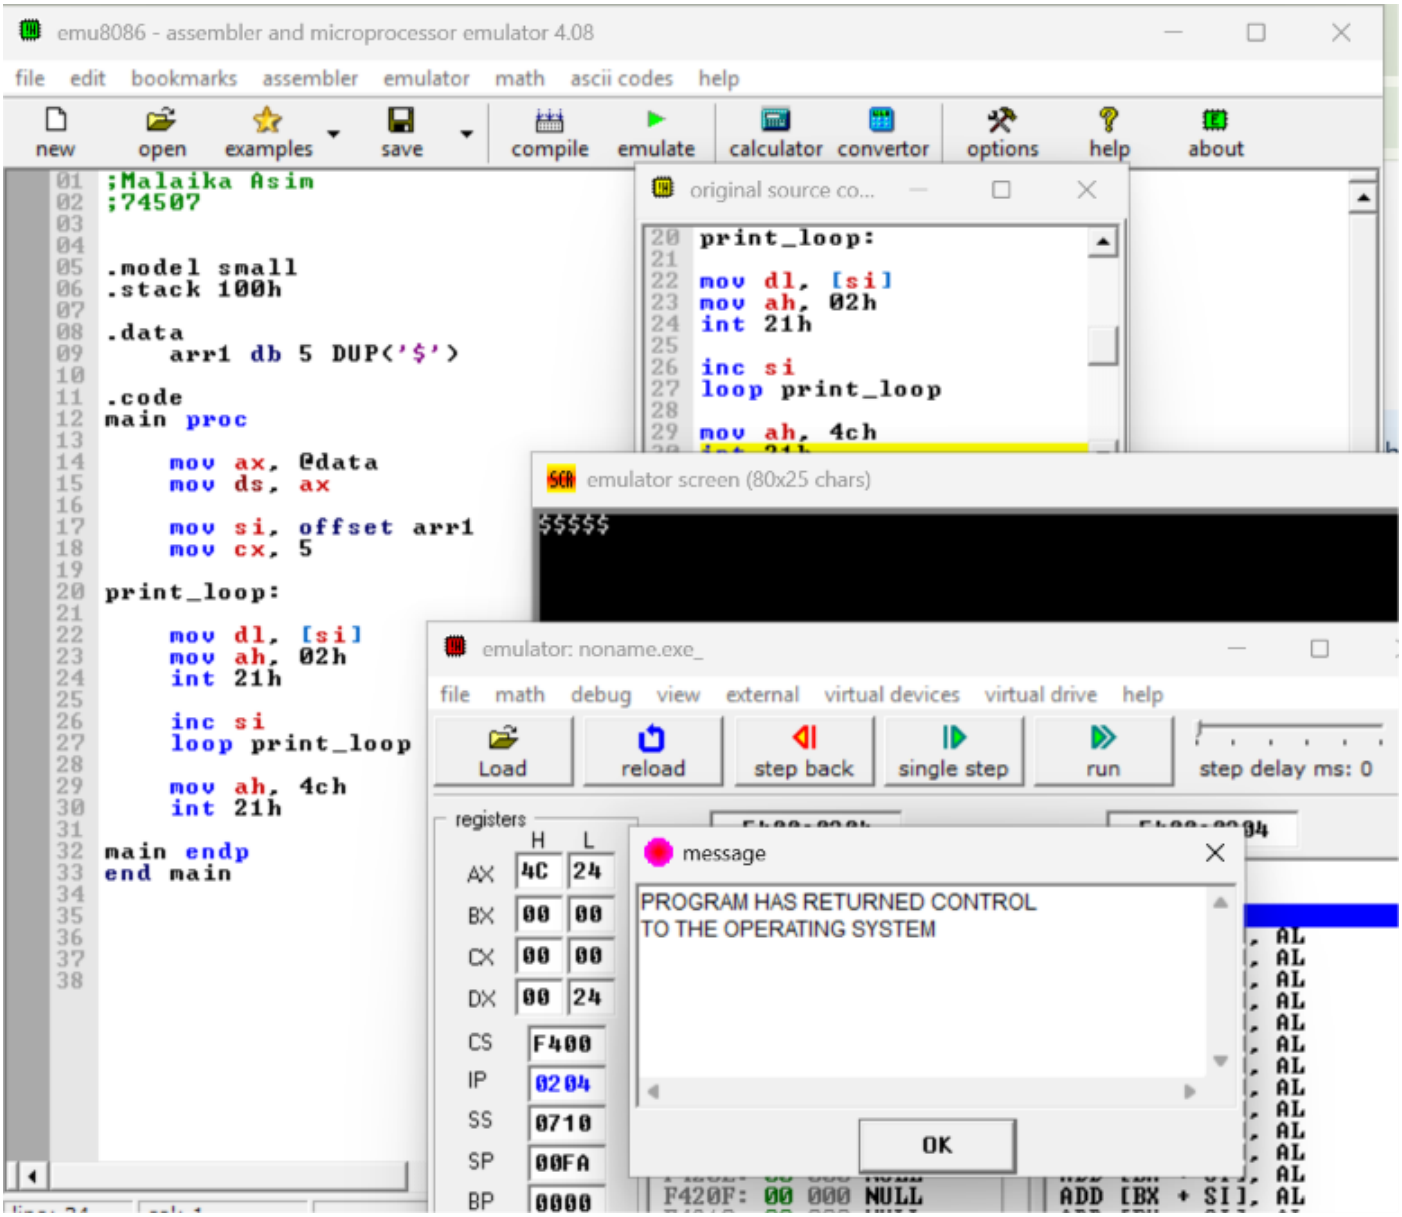

Task 01:

Define a character array: 'R', 'i', 'p', 'h', 'a','h' and print each character.

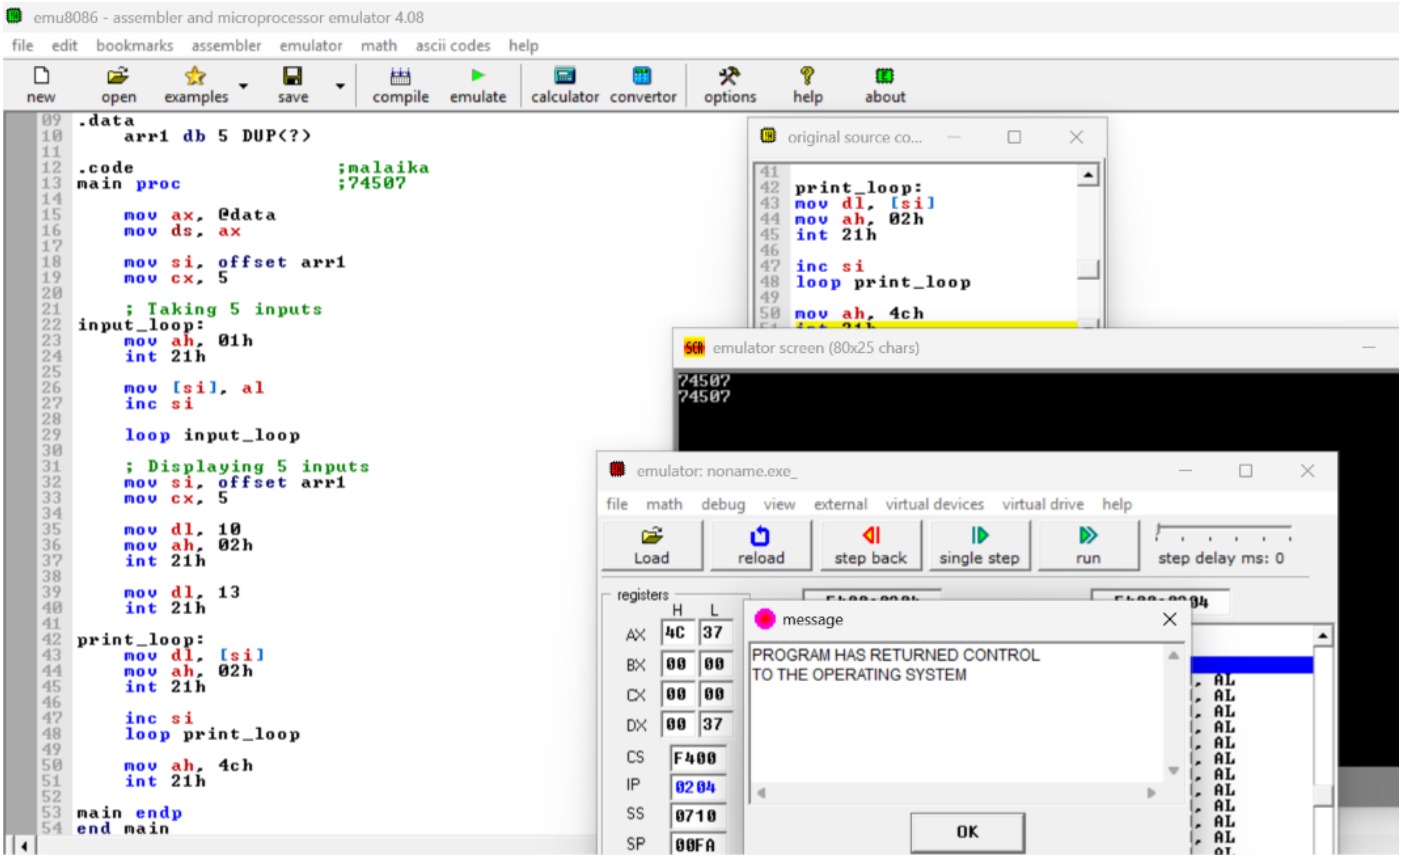

Task 02:

Use DUP to create an array of 5 '$' characters and display them.

Task 03:

Take 5 user inputs and store them in an array. Then display them

Task 04:

explain difference between array and variable?

Variable	Array
Stores one value at a time.	Stores multiple values.
Uses one memory location for one value.	Uses separate memory locations for elements.
Has a single value to access.	Elements are accessed using index or offset.
Example: num DB 5	Example: arr DB 1,2,3,4,5
Used to store individual data.	Used to store a collection of data.
Easy to manage one value.	Easy to manage multiple values.
